Create full student engagement with Kagan Structures—simple yet powerful cooperative learning instructional strategies. Supported by a large body of scientific research and proven effective in countless classrooms, schools, and districts, this revolutionary way to teach is transforming teaching and learning. Experience the power of Kagan Structures. See how easy it is to create a greater level of engagement than you ever imagined possible, even for your reluctant learners.

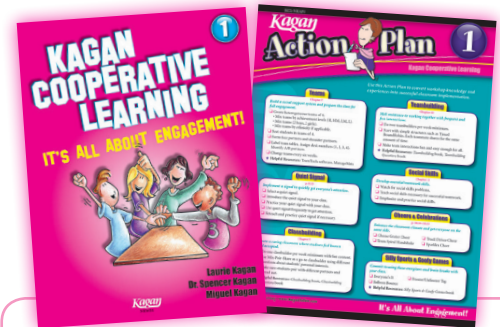

Highlights...

- Build student relationships with classbuilding and teambuilding.
- Discover the difference between group work and cooperative learning.
- Learn easy-to-use structures that make lesson planning a snap.
- Narrow achievement gaps by structuring engagement for all students.
- Gain an understanding of how to create effective student teams.
- Gather effective management tips that can be used in any classroom.
- Create an environment where all students are accountable every day.

Discover Kagan. Discover full student engagement!

Rave Reviews...

- “Cooperative Learning training by Kagan has changed the engagement in my classrooms—positive, fun-filled learning is going on!”
—Dianne Miller, Principal
- “Love the structures! They’re effective, maximize student engagement, and require little to no extra materials.”
—Bethany Ogburn, Teacher
- “After 30 years of teaching, hands down the best teacher in-service I’ve attended. Kagan structures make sense and I’m excited to implement them in my classroom.”
—Cheryl Triepke, Teacher

It's All About Engagement!

Benefits of Kagan Structures

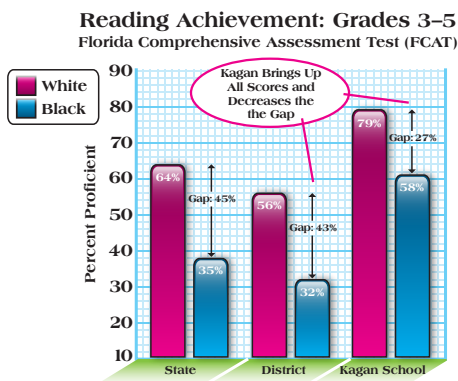

1 Increased Student Achievement

An independent research team at SUNY published a series of carefully controlled, peer reviewed, scientific research studies. The results: Kagan methods produced an average effect size gain of .92 that translates to a 32-percentile gain! Students at the 50th percentile after using Kagan Structures score on average at the 82nd percentile!

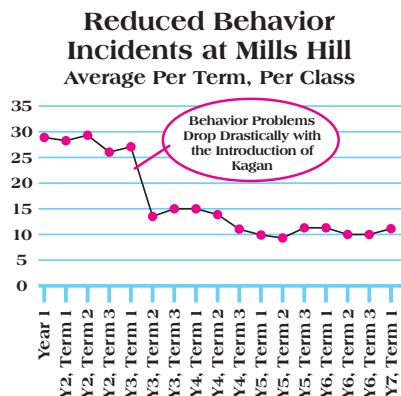

2 Reduced Achievement Gap

With Kagan methods, disengaged students become fully engaged, resulting in marked reductions in the achievement gap. The dramatic gains of the bottom group are not at the expense of the top group. All groups experience achievement gains.

3 Drop in Discipline Referrals

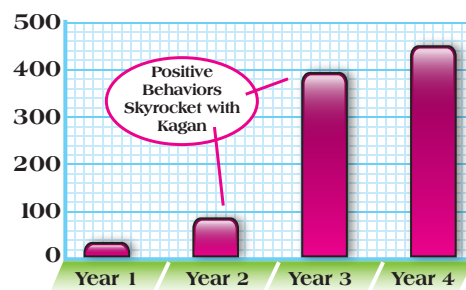

Across numerous studies discipline referrals decrease dramatically lower following the introduction of Kagan methods. The drop occurs within the first year and continues for years with continued implementation of Kagan! Engaged students are less disruptive.

4 Positive Social Skill Development

When students are taught using Kagan Structures, they naturally acquire social skills due to the cooperative nature of Kagan methods. Schools monitoring positive student behaviors report more cooperative and helping behaviors. Kinder and more caring students are less prone to bullying and violence.

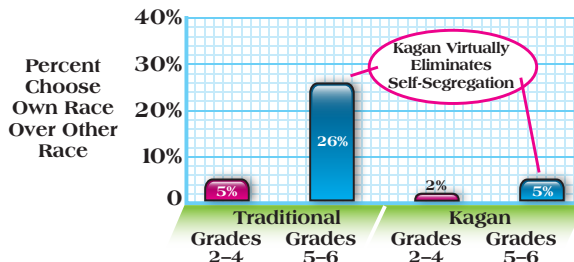

Positive Referrals Following Kagan Adoption

5 Improved Race Relations

Cross-race friendship choices increase dramatically after the introduction of Kagan Cooperative Learning methods. Self-segregation of students and negative racial stereotyping virtually disappear; students choose other-race friends almost as often as same-race friends!

Cross-Race Friendship Choices
