

Introducing The Work Sampling System

What is Work Sampling?

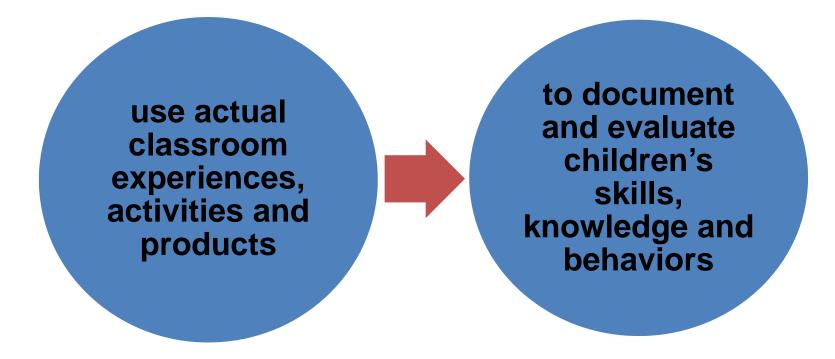

- Authentic Performance Assessment
- Curriculum Embedded
- Instructional Assessment

Work Sampling helps teachers:

The Work Sampling System

Curriculum Embedded Assessment

Work Sampling enables teachers to:

learn about their students by encouraging them to show what they know and what they can do.

Activities might include:

- ✓ Solving problems
- ✓ Writing in journals
- ✓ Interacting with peers
- ✓ Constructing with blocks
- ✓ Painting
- ✓ Doing experiments

Instructional Assessment

Primary focus is on helping teachers make instructional decisions in their classrooms

Comprehensive means of monitoring children's social, emotional, physical and academic progress

Based on teachers'
observations of students
who are actively working
and creating products within
the context of their daily
classroom experience

Designed to provide meaningful feedback to teachers, students and their families and other educators

Evaluation

A student's work is assessed through:

- Guidelines and Checklists
- Teacher observations
- Work samples

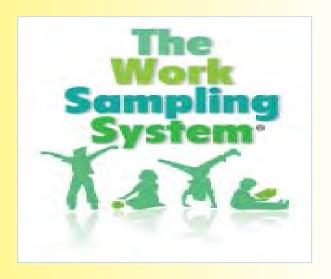

Domains

- Personal and Social Development
- Language and Literacy
- Mathematical Thinking
- Scientific Thinking

Physical Development, Health and Safety

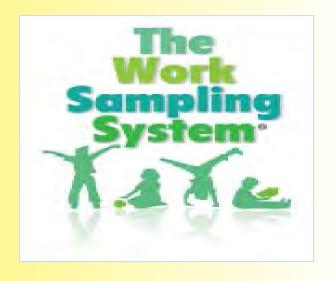

Work Sampling Components

Guidelines and Checklists are organized by:

Domains	Broad areas of a student's growth
Functional Components	Subsets of a domain comprised of several performance indicators
Performance Indicators	Skills, behaviors and accomplishments to be taught and assessed in the classroom

Understanding the Developmental Guidelines and Checklists

Example-Guidelines and Checklists

Domain

 Personal and Social Development, Language and Literacy, Mathematical Thinking, Scientific Thinking and Physical Development/Health and Safety

Functional Component

 Process and Practices, Number, Operations and Algebraic Thinking, Measurement and Geometry

Performance Indicator

Begins to recognize patterns and makes simple generalizations

Let's Begin...

Developmental Guidelines

Domain with Description

Language and Literacy

The language and literacy skills needed to understand and convey meaning are presented in four components: Listening, Speaking, Reading, and Writing. Students acquire proficiency in this domain through experience with language, print, and informational text and literature in a variety of contexts. Over time, students learn to construct meaning, make connections to their own lives, and gradually begin to analyze and interpret what they hear, observe, and read. They begin to communicate effectively orally and in writing for different audiences and varying purposes.

Language and Literacy for English Language Learners (ELLs) consists of three functional areas: Listening, Phonological Awareness, and Speaking. Depending on the grade level, these areas contain performance indicators such as Gains Meaning by Listening, Follows Directions, Develops Awareness of the Sounds of English, Speaks in Social Situations, and Communicates for a Variety of Purposes, Using Expanded Vocabulary. As with all other performance indicators, there are three ratings, although grade-level expectations of mastery for ELLs are not given since children can come to school at different ages with varying levels of English language acquisition.

Components labeled with letters

A Listening

Performance Indicators numbered with Rationale and Examples

- 1 Gains meaning by listening.
 - Four-year-olds gain knowledge about their world by listening to adults and children. They can listen not only when they are spoken to one-on-one by adults and peers, but also in adult-led small groups. They ask questions about information they do not understand and talk about the connections between events in a story and their own lives. Listening with understanding is enhanced as children participate in singing and chanting activities. Examples include:
 - conversing with another person and continuing the discussion about pets from the morning group time;

- answering the question "What comes next?" in a digital story before moving to the next screen;
- listening to recorded stories and showing understanding through body language or pointing to appropriate pictures;
- asking questions to further understand (e.g., "Where did the snow go when it melted?" or "Why did the snow melt?");
- connecting a story or poem about snow to the big snowfall at their grandmother's house;
- recalling an earlier part of a story read aloud in order to make sense of a later part.
- 2 Follows two- or three-step directions.

Four-year-olds are beginning to follow simple two- and threestep directions with relative ease and even respond well to group instructions, especially if they are part of a classroom routine. They can follow a three-step direction that is new and not part of a classroom routine, however; adults need to emphasize the unfamiliarity of the directions and may need to repeat them. Examples include:

- responding to familiar routines and instructions given to the class (e.g., "Go get your coats and when you are dressed, sit down on the rug");
- repeating an instruction to a friend;
- following directions on a CD to perform various movements;
- following a sequence of directions that begin with something familiar and include a new action;

Developmental Checklist accessed in the PMRN under the WSS tab or TAM Appendix p. 50-51

Documentation Steps

Step 1

 Gather data through recorded observations, work samples and/or photographs.

Step 2

 Make ratings on the Checklist in response to your informal observational notes.

PEARSON

WSS Reference Table

Suggested Activities

The Work Sampling System

Work Sampling System Reference Table

WSS Domains/Functional Components	Performance Indicators	Not Yet	In Process	Proficient	Suggested Classroom Activity (WC=Whole Class, SG=Small Group, i=Individual)
Personal and Social Developmen	nt				
A. Self-Concept	Demonstrates self-confidence. Shows some self-direction.				SG or I: Teacher provides daily opportunities for child to self-select activities, such as choosing a role in dramatic play, or deciding to build an airport with blocks, forming a plan, and then implementing I with others already working with the blocks.
B. Self-Control	Follows simple classroom rules and routines. Manages transitions.				WC or SG: Daily with students, teacher discusses, models, and helps scaffold student's understanding of class rules. Teacher observes students interacting, noting if "kind words" and classroom rules are followed.
C. Approaches to Learning	Shows eagerness and curiosity as a learner: Attends to tasks and seeks help when encountering a problem. Approaches tasks with flexibility and inventiveness.				WC or SG: Teacher provides activities with enough time for children to demonstrate persistence and flexible solutions with potentially difficult tasks. Teacher might look for children to follow teacher suggestions for solving a problem (e.g., understanding that putting another block at the base of the tower would make it more stable), or try several different ways to form Play-Doh into a specific object.
D. Interaction With Others	Interacts easily with one or more children. Interacts with familiar adults. Participates in the group life of the class. Identifies some feelings and responds to those of others. Begins to use simple strategies to resolve conflict.				WC or SG: Daily, teacher provides opportunities for children to interact with each other during learning experiences. Teacher observes children working cooperatively with each other to paint on the same side of the easet; or giving alternatives to friends, such as, "I'm playing with these, you play with those."
Language and Literacy					
A. Listening	Gains meaning by listening. Follows two- or three-step directions.				SG or I: Teacher provides activities that require children to listen to instructions, stories, or conversations. For example, teacher looks for child to listen to recorded stories and demonstrate understanding through body language or politing to appropriate pictures. Or, teacher observes child response during daily pack-up routine to see how the child manages familiar routines.
B. Speaking	Speaks clearly enough to be understood without contextual clues. Follows rules for conversation. Uses expanded vocabulary and language for a variety of purposes.				WC, SG, or I: Teacher considers how effectively the child can communicate his/her message, for example, without constantly asking, "What did you say?" Teacher can also use sensory activitie (during art or science) to give opportunities for the child to use sensory language to describe the experience (e.g., the sand-paper felt scratchy). The teacher may ask, "What is another name for that?" or "What is another way to say that?"
C. Reading	Begins to develop knowledge of letters. Demonstrates phonological awareness. Shows appreciation and understanding of books and reading. Recounts some key ideas and details from text.				WC: Teacher reads book to class and emphasizes several letter sounds in the story. Teacher calls upon each child to point to a word in the room that begins with one of the selected letters. Teacher says certain words from the story and asks children to say a word that thymes. Teacher says two-syllable words and asks children to jump once for each syllable they hear. Teacher asks children questions about the story. SG; In the book area, the teacher observes children looking at books in an orderly fashion (e.g., turning one page at a time, going from front to back). Daily, the teacher provides opportunities for children to reteil main events of a story just read or told by the teacher.

Checklist Ratings

Not Yet (NY)

- Skill, knowledge or behavior is not yet demonstrated.
- ✓ 1 point

In Process (IP)

- Skill, knowledge or behavior is emerging but not consistently demonstrated.
- Child can perform part of a skill, but not all of it.
- √ 2 points

Proficient (P)

- ✓ Skill, knowledge or behavior is consistently demonstrated and observed in child's range of performance.
- Proficiency is determined within context of what is expected for the child's age.
- √ 3 points

Other Checklist Ratings

Not Applicable

Skill, knowledge
 or behavior is not
 applicable to the
 student being
 observed (i.e.
 cannot perform
 due to specific
 disability)

Did Not Observe

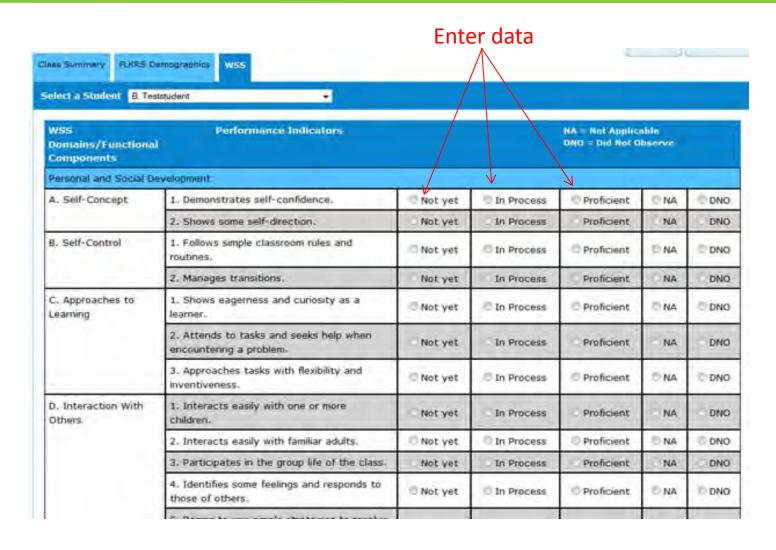

Skill, knowledge or behavior may be present, however due to excessive absences, recent enrollment, etc., behavior and/or skill was not observed.

Notes:

 Every attempt should be made to observe all the indicators.

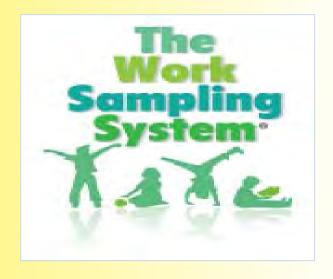

Key Points to Remember

Developmental Guidelines and Checklists

- Performance indicators across five domains
- Formally rated in the first thirty days of school
- Evidence includes teacher observations, work samples and other sources of information

Communicating with Parents

Sharing the Data

The classroom teacher has a wealth of specific knowledge about how the child approaches learning.

By using work samples and Checklists, the classroom teacher can communicate clearly with specialists and family members about how the child performs in the classroom.

The Work Sampling System provides rich, detailed, individualized portraits of children, including those with special needs.

Checklist ratings become more accurate when specialized teachers include their own observations and evidence to paint a complete picture of the child.
